README — Dify RAG Proof-of-Concept Knowledge Base

Purpose: a demonstration corpus for an "AI grant/programme advisor" chatbot built on Dify, for a Singapore Institute of Technology industrial attachment project with the Singapore Manufacturing Federation (SMF).

Corpus compiled: 26 July 2026. All "as of" statements in every file refer to this date.

■■ READ THIS BEFORE ANY SMF-FACING DEMO

1. **This corpus contains no real SMF internal documents.** It was built from publicly available Singapore government sources because SMF's own advisory material was not available to the project team at the time of compilation.
2. `member_case_studies.md` **is entirely fictional.** Company names, figures and outcomes are invented. It is marked as synthetic at the top of the file and in every section. It must never be presented as a record of real SMF members.
3. **Every dollar figure, percentage and date in this corpus must be re-verified against the official source page immediately before any SMF-facing demonstration.** Singapore's enterprise support schemes change at every Budget, and 2026 is an unusually volatile year (see "Why 2026 is a moving target" below).
4. **Anything marked `TO VERIFY` is genuinely unverified.** It was not guessed, estimated, or filled in from memory. Where a figure could not be found on an official page, the corpus says so explicitly rather than inventing a plausible number. If the chatbot surfaces a `TO VERIFY` marker in an answer, that is correct behaviour, not a bug.
5. **Two official domains could not be accessed during compilation:** `imda.gov.sg` and `a-star.edu.sg`. The IMDA and A*STAR notes are consequently thin and heavily caveated. `gobusiness.gov.sg` and `smfederation.org.sg` are client-rendered applications that return no readable content to automated retrieval, so their page contents are also missing.

What Is Real and Sourced

The following files are derived from official Singapore government publications and are quoted, not paraphrased from memory. Each file carries its source URLs and a "Last Verified" line.

File	Primary source	Confidence
`grant_edg.md`	enterprisesg.gov.sg — EDG scheme page + FAQ	**High.** Eligibility, cost categories, exclusions, application process and 50% SME rate quoted directly. Two `TO VERIFY` items (70% sustainability rate end date; Investment Allowance extension beyond 31 Mar 2026).
`grant_psg.md`	enterprisesg.gov.sg — PSG scheme page	**High** on eligibility and process. One material `TO VERIFY`: the basis of the S$30,000 figure (per company per year vs per application) is not stated on the page. Solution catalogue could not be read.
`grant_mra.md`	enterprisesg.gov.sg — MRA page + Business Refresh Package factsheet	**High.** 70% SME rate (from 1 Apr 2026), S$100,000 cap, three pillar sub-caps (S$20k/S$50k/S$30k), and the S$100,000 / 3-year new-market test all quoted. One `TO VERIFY` (whether audit cost support also rose to 70%).
`grant_sfec.md`	enterprisesg.gov.sg — SFEC page	**High** on mechanics. One critical `TO VERIFY`: the exact final claim deadline within 2H 2026.

File	Primary source	Confidence
grant_eeg.md	enterprisesg.gov.sg — EEG page + Business Refresh Package factsheet	**High.** Two-tier structure, S$30,000 / S$350,000 caps, 70%/30% rates, full SSIC sector list and closed sub-streams all quoted. Two **TO VERIFY** (all-sector Base Tier expansion details; the SME definition used for the 70%/30% split).
grant_efs.md	enterprisesg.gov.sg — EFS overview and four sub-scheme pages + factsheet	**High** on published quanta, tenors and risk-share percentages. **TO VERIFY**: the substantive detail of the 1 Apr 2026 enhancements is announced by banner only; three EFS-Green quantum cells are blank on the official table.
grant_edge_upcoming.md	enterprisesg.gov.sg Business Refresh Package factsheet (Mar 2026) + scheme-page banners	**High** on what has been announced. EDGE itself had **not launched** as at 26 July 2026, so all operational detail is necessarily provisional.
grant_ccp_wsg.md	wsg.gov.sg — three CCP pages	**Mixed.** Eligibility and structure are well verified. **The base salary support rate, monthly cap and duration are all TO VERIFY** — they live in WSG PDFs that could not be retrieved. This file is the least usable for a "how much will I get" question.
grant_imda_digital_ai.md	disg.gov.sg + enterprisesg.gov.sg	**Split.** The **Enterprise Compute Initiative** section is fully verified from disg.gov.sg (last updated 19 Jun 2026). Everything IMDA-owned — SMEs Go Digital, Industry Digital Plans, Digital Leaders Programme, CTO-as-a-Service, GenAI Sandbox, Advanced Digital Solutions — is **unverified**, because imda.gov.sg was inaccessible.
grant_astar_manufacturing.md	enterprisesg.gov.sg cross-references only	**Low to mixed. T-Up** is fully verified (70%/30%, S$250,000 per project cap, ≤2 years). **OTR and Tech Access could not be confirmed to still exist at all.** ARTC's existence is confirmed only by a passing EnterpriseSG reference; no membership or fee data. a-star.edu.sg was inaccessible.
smf_services_overview.md	smfccl.sg (readable) + smfederation.org.sg navigation only	**Mixed.** SMF's founding year (1932), ~5,000 corporate members, 10 Industry Groups, and SMF CCL's training catalogue, ASCM Premier Partner status and WSG Programme Manager role are verified. **Membership tier names and all fees are unobtainable** — the SMF membership page is client-rendered and returned no content. **No membership fee appears anywhere in this corpus.**

What Is Synthetic

File	Status
member_case_studies.md	**100% fictional companies, people, figures and outcomes.** The *scheme mechanics* referenced within each case (support rates, caps, eligibility tests, pitfalls) are drawn from the verified notes above. The *business situations* are invented composites across five sub-sectors: precision engineering, food manufacturing, metal stamping, electronics assembly and packaging.

Additionally, the **framing and voice** of all scheme notes — the "SMF Advisory Note" header, the "Common Pitfalls" sections, and the advisory tone — are **written by the project team, not by SMF**. The pitfalls are inferred from the published rules (e.g. "do not pay a deposit before applying" follows directly from EnterpriseSG's stated retrospective-application rule), but they are not SMF's official guidance and SMF has not reviewed them.

Why 2026 Is a Moving Target

Three overlapping transitions make this corpus unusually perishable:

1. **EDGE.** From 2H 2026, EnterpriseSG is consolidating **EDG, PSG and MRA** into a single activity-based grant called **EDGE**, supporting all Singapore businesses including non-SMEs, at up to **S$100,000 per year**. As at 26 July 2026 it had not launched and no launch date had been published. When it launches, three of the corpus files become historical.
2. **SFEC wind-down.** Final claims for SFEC-supportable programmes are due **by the second half of 2026** — i.e. now. The exact deadline date is not published.
3. **Budget 2026 / Business Refresh Package changes effective 1 April 2026**, plus a further MOF Ministerial Statement of 7 April 2026 expanding the EEG Base Tier to all sectors and extending it to 31 March 2028. Implementing details for the latter had not been published at compilation.

Any demo run more than a few weeks after 26 July 2026 should assume at least one headline figure has moved.

Suggested Chatbot Guardrails for the PoC

Because of the accuracy profile above, the Dify application should be prompted to:

1. **Always cite the source file and the "Last Verified" date** in its answer.
2. **Surface `TO VERIFY` markers verbatim** rather than smoothing over them. If the retrieved chunk says a figure is unverified, the answer must say so.
3. **Refuse to state a figure that is not in the retrieved context.** No filling gaps from model priors — this is the single highest-risk failure mode for a grants advisor, because plausible-sounding wrong numbers are worse than "I don't know".
4. **Never give an eligibility determination.** The bot may explain criteria; it must not tell a member they "qualify" or "will be approved". Only EnterpriseSG, WSG, DISG or the relevant PFI can decide.
5. **Refuse out-of-scope requests** — anything unrelated to Singapore enterprise support schemes and SMF services, and in particular anything touching tax avoidance, misrepresenting eligibility, or circumventing grant conditions.

6 **Flag the SMF case studies as illustrative** whenever it draws on `member_case_studies.md`.

7 **Ask a clarifying question** when the member's sector, size, ownership or intent is unknown — these determine which scheme applies and the answer changes materially.

Reproducibility Notes

- Sources were retrieved by automated fetch on 26 July 2026.
- EnterpriseSG's pages carry a broken `Last updated on [[UPDATED]]` template placeholder, so no page-level revision date could be captured for any enterprisesg.gov.sg source. The disg.gov.sg ECI page did carry a real date (19 Jun 2026), as did smfccl.sg's blog and grant pages.
- **Blocked or unreadable during compilation:** `imda.gov.sg` (all paths), `a-star.edu.sg` and subdomains, `mti.gov.sg`, `mof.gov.sg`, `edb.gov.sg`, `smartnation.gov.sg`, `aisingapore.org`, `web.archive.org`, all search engines; `gobusiness.gov.sg` and `smfederation.org.sg` resolve but return no readable body.
- To close the remaining gaps, the highest-value actions are: (a) open the SMF membership and Industry Group pages in a real browser; (b) download WSG's CCP Factsheet and CCP FAQ PDFs; (c) access imda.gov.sg and a-star.edu.sg directly.
