Productivity Solutions Grant (PSG) — SMF Advisory Note

Internal advisory note for SMF member-facing officers. Summarised from Enterprise Singapore's published scheme page. Not legal or financial advice; final determination rests with EnterpriseSG.

Overview

The Productivity Solutions Grant (PSG) helps Singapore SMEs improve productivity and automate existing processes through **pre-approved IT solutions and equipment**. It is the fastest and simplest of the EnterpriseSG grants: the member picks a solution from a published catalogue, gets a quotation from the pre-approved vendor, and applies. There is no bespoke project proposal and no consultant certification requirement.

PSG is the correct first recommendation for SMF members who want an ERP or MES module, inventory/warehouse system, accounting software, a collaborative robot or a standard piece of production equipment on the approved list. If the member's need is bespoke integration or new product development, redirect to EDG.

IMPORTANT — scheme consolidation. EnterpriseSG has announced: *"EDGE launches in 2H2026. Existing grants (EDG, MRA, PSG) remain accessible until launch."* PSG will be folded into the new **EDGE** grant from 2H 2026. See `grant_edge_upcoming.md`.

What It Funds

PSG supports both **sector-specific** and **generic (cross-sector)** solutions that have been pre-approved by EnterpriseSG and participating agencies. Categories relevant to manufacturing members typically include:

- Enterprise resource planning, inventory and warehouse management systems
- Customer and sales management systems
- Financial and HR management systems
- Digital marketing and e-commerce solutions
- Cybersecurity solutions
- Selected production and materials-handling equipment
- Pre-approved consultancy services (e.g. carbon management)
- **GenAI and AI-enabled solutions.** EnterpriseSG's Productivity & Digitalisation hub now signposts "GenAI Solutions for SMEs — Tap on a range of GenAI solutions through the Productivity Solutions Grant" and "AI-enabled solutions for SMEs". This appears to be the successor route to IMDA's earlier standalone GenAI Sandbox. **TO VERIFY: the specific list of PSG-supported GenAI solutions and any dedicated cap — the GoBusiness catalogue could not be read during this compilation.**

The definitive catalogue is on **GoBusiness Gov Assist**:
https://www.gobusiness.gov.sg/productivity-solutions-grant/

Only the actual purchase of the pre-approved solution package is supported. Related administrative charges such as **delivery fees and installation fees are excluded**.

Eligibility

- Business entity registered and operating in Singapore.
- At least **30% local equity** held directly or indirectly by Singapore Citizens and/or PRs, determined by ultimate individual ownership.
- **Group annual sales turnover not exceeding S$100 million OR group employment size not exceeding 200 employees.**
- The IT solution or equipment purchased, leased or subscribed to must be **used in Singapore**.
- The applicant must **not have made payment or any form of deposit** to a supplier, vendor or third party before submitting the application.

- Excluded entity types: charities, Institutions of Public Character (IPCs), religious entities, Voluntary Welfare Organisations, government agencies and their subsidiaries, and societies.
- Employers eligible for the SkillsFuture Enterprise Credit (SFEC) may qualify for additional subsidy on top — but note SFEC's claim deadline (see `grant_sfec.md`).

Group applications (two or more companies on one form) are not allowed. Each UEN may only be associated with one application submission.

Funding Support

- **Up to 50% of eligible costs for local SMEs.**
- EnterpriseSG's page states: *"Receive up to $30,000 and improve your business productivity."* Our reading is that this is a **S$30,000 grant cap per company per annum**. **TO VERIFY with EnterpriseSG whether the S$30,000 cap is per company per financial year, per application, or lifetime — the public page does not state the basis explicitly.** Do not quote the basis to a member without confirming.
- Retrospective applications are not supported.

How to Apply

1. **Identify the solution and vendor** from the GoBusiness Gov Assist catalogue.
2. **Get quotations.** For IT solutions, obtain the quotation from a pre-approved vendor and ensure the items and costs match **Annex 3** of the selected PSG pre-approved solution package. For equipment, source a vendor quotation with product brochure and technical specifications. For consultancy, use a pre-approved consultant.
3. **Prepare documents:** contact details including the Letter of Offer addressee (CEO/MD as registered with ACRA or another authorised individual); **financial statements for the past 3 years** (plus ultimate group statements, ACRA bizfiles and group structure if part of a corporate group); vendor proposal/quotation addressed to the exact ACRA-registered company name; deployment location evidence (tenancy agreement or utility bill) if deploying to a non-ACRA-registered address; and a business impact description with productivity gains.
4. **Apply on the Business Grants Portal (BGP)** via Corppass. Third-party application or management is not permitted.
5. **Processing typically takes 6 weeks.**
6. **Accept the Letter of Offer** within the stated timeline.
7. **Complete the project:** the solution must be purchased/subscribed as approved, **deployed and installed for at least 30 days**, and **paid in full**.
8. **Submit claims** on BGP with invoice, proof of full payment, a usage report showing at least one month of use (IT solutions only), and a photo of the software licence number or equipment serial number — the number must also be declared in the claim form.
9. **Disbursement** takes ~14 working days via PayNow Corporate; GIRO may take up to eight weeks.

Common Pitfalls

- **Paying a deposit before applying.** This disqualifies the application outright. Members routinely place a deposit to "hold" a machine.
- **Quotation addressed to a short-form company name.** If the ACRA name is "ABC Global Pte Ltd", a quotation to "ABC Global" will be rejected.
- **Quotation not matching Annex 3.** Vendors sometimes bundle extras; the quotation must mirror the approved package.
- **Claiming delivery and installation.** Not supported.
- **Missing the 30-day deployment requirement** before claiming.
- **Losing the licence/serial number photo.** A surprisingly frequent claim-stage blocker.
- **Buying a solution that is not on the catalogue** and assuming a similar product qualifies. It does not.
- **Assuming PSG and EDG can both fund the same item.** They cannot.
