Energy Efficiency Grant (EEG) — SMF Advisory Note

Internal advisory note for SMF member-facing officers. Summarised from Enterprise Singapore's published scheme page. Not legal or financial advice; final determination rests with EnterpriseSG.

Overview

The Energy Efficiency Grant (EEG) co-funds business investment in **energy-efficient (EE) equipment**. It is administered by EnterpriseSG and is highly relevant to SMF's membership because **Manufacturing (including Food Manufacturing) is one of the pre-approved sectors** and is one of only two sectors eligible for the higher Advanced tier.

EEG is the right recommendation when a member wants to replace an ageing chiller, air compressor, boiler, motor, LED system or refrigeration unit with a more efficient model — an area PSG and EDG do not cleanly cover (EDG explicitly excludes "installation of conventional, operational and off-the-shelf solutions, appliances or devices, e.g. energy-saving LED lightings, solar panels").

2026 status — two separate extensions announced:

1. **Budget 2026:** EEG extended for one year, from **1 April 2026 to 31 March 2027**.
2. **MOF Ministerial Statement, 7 April 2026:** the **EEG (Base Tier) will be expanded to all sectors** (beyond the current six) and **further extended to 31 March 2028**. EnterpriseSG's page states "More details on this announcement will be shared later this year." **TO VERIFY: the effective date of the all-sectors Base Tier expansion, and whether support rates change under it. As at 26 July 2026 the implementing details had not been published.**

What It Funds

EEG provides **two tiers**:

Base tier — support for **pre-approved EE equipment** only. The list of supported equipment is published on GoBusiness: https://www.gobusiness.gov.sg/energy-efficiency-grant/

Advanced tier — for larger investments driving greater energy efficiency. Equipment **need not be pre-approved**, but must demonstrate energy savings **above 350 tonnes lifetime carbon abatement**. The Advanced tier is only available to selected sectors.

Eligibility

Base tier. Business entity registered and operating in Singapore in one of the following sectors:

- **Construction** — SSIC 41 to 43
- **Data Centres and their users** — equipment must be hosted at a commercial data centre in Singapore
- **Food Services** — valid Singapore Food Agency licence and SSIC 56 or 68104
- **Maritime** — port companies under SSIC 23940, 24109, 49231, 50021, 50023, 52101, 52221, 52222, 52224, 52243, 52292
- **Manufacturing (including Food Manufacturing)** — **SSIC 10 to 32**
- **Retail** — SSIC 47

Plus:

- Minimum **30% local shareholding** (waived for users of data centres)
- **Group Annual Sales Turnover of no more than S$500 million**
- Equipment purchased must be used in Singapore

Advanced tier. Only **Construction (SSIC 41–43)** and **Manufacturing including Food Manufacturing (SSIC 10–32)**, plus the same 30% local shareholding, S$500m group turnover and Singapore-use criteria.

Closed sub-streams: applications for EEG (Base) for the **Harbourcraft** sector and EEG (Advanced) for the **Port** sector **closed on 31 March 2026**.

Companies may not be eligible if procurement of the equipment has commenced at the point of application — in particular, the application may be rejected if payment has been made to a third party who is part of the application before the application date.

Funding Support

Tier	Support cap per company	Qualifying equipment	Support rate
Base	Up to **S$30,000**	Pre-approved EE equipment	**Up to 70% for SMEs** and **up to 30% for non-SMEs**, until 31 March 2027
Advanced (selected sectors only)	Up to **S$350,000 across base and enhanced tiers**	Need not be pre-approved; must demonstrate >350t lifetime carbon abatement	The **lower of**: (a) support levels under the base tier; or (b) grant quantum computed from the equipment's expected lifetime energy savings

Note the Advanced tier cap of **S$350,000 is a combined cap across both tiers**, not additional to the Base tier's S$30,000.

How to Apply

Base tier: apply through the **Business Grants Portal (BGP)** at apply.gov.sg/grants/business. EnterpriseSG publishes a step-by-step guide at https://files.app.optical.gov.sg/gobusiness/production/assets/e3388afb-1248-4198-ae43-6f687e59c5b0.pdf

Advanced tier: companies in Construction, Manufacturing (incl. Food Manufacturing) and Maritime should refer to GoBusiness for the application process: https://grants.gobusiness.gov.sg/support/energy-efficiency-grant/

Documents to prepare:

- Quotations from the vendor, **with a breakdown of fees**
- Product brochures
- Tenancy agreement or contractual agreements for the deployment location(s), utility bills, telco bills
- Financial statements
- Corporate structure, where shareholdings are complex

Procedural rules:

- **A new application is required if the vendor changes after approval.**
- **Multiple applications are required for different equipment types/models** — one application cannot cover a mixed basket.

Common Pitfalls

- **Starting procurement before applying.** As with all EnterpriseSG grants, payment to a third party before the application date is fatal.
- **Submitting one application for several equipment models.** A member replacing three different compressor models needs three applications.
- **Assuming the Advanced tier stacks on the Base tier.** The S$350,000 is a combined cap.
- **Wrong SSIC code on ACRA.** Manufacturing members whose ACRA primary SSIC has drifted (e.g. registered under a wholesale trade code) may fail the sector test even though they physically manufacture. Advise members to check their ACRA SSIC before applying.
- **Turnover confusion.** EEG uses a **S$500 million** group turnover ceiling — much higher than PSG/MRA's S$100 million — so some members who fail PSG's SME test still qualify for EEG. But the **70% rate is only for**

SMEs; non-SMEs get up to 30%. **TO VERIFY: EnterpriseSG's EEG page does not define "SME" for the purpose of the 70%/30% split on that page — confirm which definition applies before quoting a rate.**

- **Equipment not on the pre-approved list** being submitted under the Base tier. It must go via the Advanced tier (if eligible) or not at all.
- **Missing the sector cut-offs.** Harbourcraft (Base) and Port (Advanced) closed 31 March 2026.
