EDGE — The New Consolidated Grant (Launching 2H 2026) — SMF Advisory Note

Internal advisory note for SMF member-facing officers. Summarised from Enterprise Singapore's Business Refresh Package factsheet (March 2026) and scheme-page banners. Details are provisional until EnterpriseSG publishes the full EDGE scheme.

Overview

EDGE is the single most important thing SMF advisors need to know about in 2026. Under the **Business Refresh Package** announced at Budget 2026, EnterpriseSG will launch a new grant called **EDGE** in **2H 2026** that **streamlines three existing business grants — the Market Readiness Assistance (MRA) grant, the Productivity Solutions Grant (PSG) and the Enterprise Development Grant (EDG) — into a single grant scheme.**

Every one of the EDG, PSG and MRA scheme pages currently carries the banner:

> *"EDGE launches in 2H2026. Existing grants (EDG, MRA, PSG) remain accessible until launch."*

As at 26 July 2026, EDGE has not yet launched and EnterpriseSG has not published a specific launch date — only "2H 2026" / "later this year". Members should continue to apply under the existing EDG, PSG and MRA rules until told otherwise.

What Changes

EnterpriseSG's stated rationale: *"Singapore businesses can look forward to a simplified and more seamless process when navigating and applying for funding. Businesses will no longer need to determine which grant their activities fall under for their application. Instead, they will be able to apply for funding based on their intended activities, such as enhancing digitalisation capabilities, expanding into new markets, or improving enterprise efficiencies."*

Confirmed features from the factsheet:

- **Applications will be activity-based, not grant-based.** The member describes what they want to do; they no longer pick between EDG/PSG/MRA.
- **EDGE will support all Singapore businesses, including non-SMEs** — a significant widening. PSG and MRA are currently SME-only.
- **Funding: up to S$100,000 per year per business for eligible activities.**
- **Companies needing more than S$100,000 may submit applications to EnterpriseSG for case-by-case assessment.**
- **Applicant must be a business entity registered in Singapore.** *"Other requirements may apply, depending on the supportable activity."*

MRA Enhancements That Arrive With EDGE

The factsheet separates MRA changes into two waves:

Already in effect from 1 April 2026 (under existing MRA):

- Higher support level of **up to 70% for local SMEs** (previously capped at 50%), applicable **until 31 March 2029**.
- Extension of the enhanced grant cap of **S$100,000 per company per new market** for qualifying projects.

From 2H 2026, when EDGE is implemented:

- **Eligibility extended to local non-SMEs at up to 50%** of eligible costs (previously not applicable to local non-SMEs).

- **Removal of the "new market" criterion** — support will cover not just new markets but also deepening presence in **existing** overseas markets. This is a major change for SMF members already selling into Malaysia or Indonesia who were previously locked out by the S$100,000 / three-year sales test.

Other Business Refresh Package Measures (Context for Advisors)

Announced in the same March 2026 factsheet, effective **1 April 2026** unless stated:

- **Energy Efficiency Grant (EEG):** extended one year, 1 April 2026 to 31 March 2027. (Separately, an MOF Ministerial Statement of 7 April 2026 announced Base Tier expansion to all sectors and extension to 31 March 2028.)
- **EFS-Green:** extended five years, 1 April 2026 to 31 March 2031.
- **EFS-M&A:** domestic M&A coverage made permanent.
- **EFS-Trade Loan and EFS-SME Fixed Assets:** facility-level loan caps removed; replaced by a combined **S$50 million** Borrower Group maximum across all EFS facilities.
- **Double Tax Deduction for Internationalisation (DTDi):** from **YA 2027**, the expenditure cap for claims filed **without prior approval** rises from **S$150,000 to S$400,000 per YA**, and the no-prior-approval scope expands to cover all eligible overseas market development trip and overseas investment study trip expenses plus five qualifying activities (investment feasibility/due diligence studies; master licensing and franchising; market surveys/feasibility studies; overseas business development; production of corporate brochures for overseas distribution). Expenses above S$400,000 per YA, or on overseas trade offices and e-commerce campaigns, still require application to EnterpriseSG or STB.
- **Business Adaptation Grant (BizAdapt)** — for local enterprises impacted by tariffs, to adapt operations and strengthen supply chain resilience through advisory and reconfiguration support. Runs **until 6 October 2027**. Support raised to **70% for SMEs** (previously 50%) and **50% for non-SMEs** (previously 30%).
- **Global Innovation Alliance (GIA):** support raised to **70% for SMEs** and **50% for non-SMEs**; higher level applicable until **31 March 2029**. Refreshed strategy splits into "Launch" and "Grow" pathways.
- **Enhanced Visual Merchandising (EVM) Programme** and **Heartland Enterprise Placemaking Grant (HEPG):** support raised to **up to 70%**. EVM qualifying costs up to **S$20,000** for standard projects and **S$60,000** for larger-scale projects; HEPG capped at **S$14,000 support per project**. (Heartland-focused; generally not applicable to SMF's manufacturing membership.)

How to Apply

Not yet applicable. EnterpriseSG states: *"More details will be provided when EDGE is launched later this year."* Until then, members apply under EDG, PSG or MRA on the **Business Grants Portal** at apply.gov.sg/grants/business.

Common Pitfalls / Advisory Guidance

- **Do not tell a member that PSG/EDG/MRA are "closing".** They remain accessible until EDGE launches.
- **Do not promise EDGE terms.** The S$100,000 per year figure and the non-SME eligibility are confirmed in the factsheet, but supportable-activity definitions, support percentages under EDGE, and the application mechanics are **not yet published**.
- **Timing advice matters.** A member with a large EDG project that would exceed S$100,000 should be aware EDGE's standard ceiling is S$100,000 per year, with above-cap requests assessed case-by-case. **TO VERIFY: whether EDGE's S$100,000 is a hard default or an indicative threshold, and how the case-by-case route works.**
- **Members already selling into a market** should be advised that the "new market" barrier is being removed under EDGE — it may be worth waiting rather than being rejected under current MRA rules.
- **TO VERIFY: whether the EDG-specific features (bespoke project proposals, TR 43 / SS 680 consultant certification, pre-qualified auditor panel, reimbursement basis) carry over into EDGE.**
